About Us	13

Dear Friends,

Lasting improvement in our education system begins with understanding families' experiences as they are today. When we take parents' perspectives seriously across all communities and income levels, we are better equipped to focus on the challenges that matter most and the opportunities that can make the greatest difference for students.

That belief is at the heart of our work at Louisiana Kids Matter, and it is what drives the second edition of the Survey of Educational Opportunity in Louisiana. Developed in partnership with 5CAN and Edge Research, this updated survey captures how families are experiencing the education system now, while also allowing us to see where views have shifted since the last edition, published in November 2024. As conditions for students and schools continue to evolve, so too must our understanding of whether families feel supported, informed and empowered. By returning to this survey, we can track patterns over time, compare Louisiana to other states and identify gaps that demand attention alongside areas of progress.

In Louisiana, 522 parents and guardians of school-aged children participated in the survey between September 30 and December 1, 2025, contributing to a national research effort that includes responses from more than 23,000 families nationwide, along with representative samples in each state and the District of Columbia that allows for state-by-state comparisons.

#### **Several themes stand out from Louisiana's results:**

**Investments in tutoring over the past year have paid off in the number of participating families.** Access to a tutor for families in our state grew by six points since the first edition of this survey in 2024, while unmet demand increased by five points.

**Support for Annual Testing is very strong.** Louisiana parents ranked #5 in the country in their support for annual standardized tests, with 64% favoring the continuation of these tests.

**Support for charter schools is nationally leading.** Louisiana parents ranked as the number one state in the country in their support for charter schools, with 73% saying they favored charters.

The pages that follow include:

- An overview of the survey's **methodology** and how to interpret the results
- A concise **summary** of Louisiana's performance across all five categories and 15 questions
- Visual **comparisons** showing how Louisiana stacks up nationally and how responses have changed since the previous survey

The full Louisiana report is available at [lakidsmatter.org](https://lakidsmatter.org). National results, the survey instrument, and the complete dataset can be found at [5can.org](https://5can.org).

Our hope is that this second edition continues to support informed decision-making as Louisiana works to expand educational opportunity for every student.

Sincerely,

*Kelli Bottger*

**Kelli Bottger**

Louisiana Kids Matter

# Methodology

Edge Research conducted a nationwide survey of 23,104 U.S. parents and guardians of school-aged children (K-12th grade) in each of the 50 states plus the District of Columbia. **In Louisiana, 522 parents and guardians of K-12 children were surveyed.** Respondents could take the survey in either English or Spanish, based on their preference. The survey was in the field from September 30, 2025, to December 1, 2025.

## DATA COLLECTION

The survey used a mixed-mode methodology to reach as many households as possible. First, survey respondents were recruited using online, non-probability samples obtained via national opt-in consumer research panels. These surveys were mobile-optimized (meaning participants can take the survey on a PC or mobile device, which helps reach those who do not have internet access but do have a mobile data plan). In states where Edge Research was not able to collect enough surveys using this method, they obtained supplementary text-to-web interviews.

## SURVEY REPRESENTATIVENESS

As respondents entered the survey, they submitted demographic information, and quotas were set to ensure the sample is proportionately distributed in accordance with the most recent U.S. Census and National Center for Education Statistics (NCES) data on U.S. parents in each state. Quotas functioned by predetermining the number of desired respondents by gender identity, race, ethnicity, child's grade, and grade level in each state. Once the desired number was reached with each quota group, it closed, and additional respondents were turned away. After the survey came out of the field, Edge Research reviewed the data and applied additional weights by income, marital status, parent gender, race/ethnicity, school type, and area (e.g., urban, suburban, small town, rural) within states.

**The following tables provide the demographics of survey respondents in Louisiana after weighting.**

RACE/ETHNICITY							
Hispanic/ Latino of Any Race	White Alone	Black/ African American Alone	American Indian or Alaska Native Alone	Asian Alone	Native Hawaiian or Pacific Islander Alone	Some Other Race Alone	Two or More Races
5%	64%	26%	1%	2%	0%	0.4%	2%

INCOME DISTRIBUTION		
Low Income	Middle Income	High Income
50%	44%	6%

SCHOOL LEVEL		
K-5th	6th-8th	9th-12th
45%	23%	31%

57%	10%	15%	5%	4%	2%	5%	1%	1%	

## INCOME DEFINITIONS

In the pages that follow, we provide results for low-, middle- and high-income parents. These income buckets were calculated using the Pew Research Center's study on "The State of the American Middle Class" and their category definitions:

- Middle-income households are defined as those with an income that is two-thirds to double that of the U.S. median household income, after being adjusted for household size.
- Lower-income households have incomes less than two-thirds of the median
- High-income households have incomes that are more than double the median.

Following these definitions, Edge Research adjusted the incomes reported in the survey to reflect a three-person household using the equivalence scales technique. Pulling from the U.S. Census 2023 Annual Social and Economic Supplements, they used the three-person household income breaks of \$61,000 to \$183,000 as middle, and values above and below those thresholds as lower and upper income respectively. Edge Research also adjusted each household income using Regional Price Parities (RPPs)—indexes from the Bureau of Economic Analysis—that compare local prices to the national average. These tell whether an area is more or less expensive than the country overall. RPPs are applied differently based on what is known about the household's location. If the exact metro area is known, the RPP is used for that metro area. If the household is in a non-metro (rural or small town) area, the RPP for non-metro areas in that state is used.

## DATA QUALITY CONTROL AND STANDARDS

Edge Research employed several practices to ensure data quality. The survey platform used reCAPTCHA to screen for bots. They also applied a third-party tool called Research Defender to screen out known bad actors and respondents with high survey-taking rates. In addition, data was monitored regularly while in the field. Once all responses were collected, they applied additional data cleaning processes, clearing data for cheating, speeding, inattentiveness, and AI-generated responses.

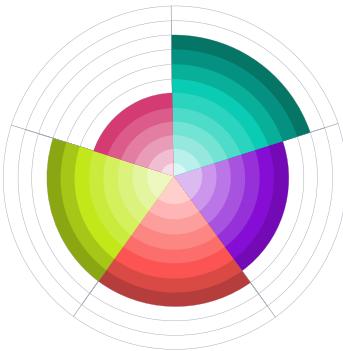

Edge Research follows the American Association for Public Opinion Research (AAPOR) Code of Professional Ethics and Practices to maintain the highest standards of competence, integrity, accountability, and transparency in public opinion and survey research work.

# How to Read the Results

One challenge with a survey of this size was how to present the results in an accessible way that doesn't sacrifice the depth of insights. We decided to present the answers in two ways: first with an overview of the results across 15 questions for our state and then with a more in-depth look at how our state compared to all the other states for a few key questions.

## OUR STATE SUMMARY

To help make it easier to look at our state's full results at a glance, we present the answers from our parents over two pages. At the top of the first page is the number of parents who participated in the survey.

We also provide a way to view our state's **relative strengths and weaknesses through a circle with five wedges**, one for each of the five categories of the survey: 1) School quality and opportunity (pink), 2) Tutoring, summer, and mental health (green), 3) Out of school activities (teal), 4) Information and engagement (purple), and 5) College and career readiness (orange).

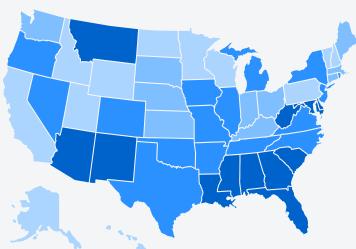

Each of the five categories is made up of three questions. These are presented below each category with **our state's results compared to other states represented by a tier** shown to the right of each question, from low to high. These tiers are scored from 1 (low) to 4 (high) and the scores across the three questions determine how many rows are colored in for the wedge (up to a possible number of 12 rows).

The state results for each question are presented in circles that offer a comparison of the state against the national average and the 2025 results compared to 2024. For yes/no questions, the results are presented as the percentage who said yes, rounded to the nearest whole number. For questions about parents' opinions and attitudes, we utilized a Likert scale and **reported out the percentage choosing the highest option**. For example, on question 1, which measures parents' satisfaction with their child's school, we present the percentage who answered that they were "very satisfied." This helps ground the comparison discussion in a high bar for success.

## OUR STATE IN CONTEXT

The second section of this report provides comparative results for all 50 states plus D.C., one question at a time.

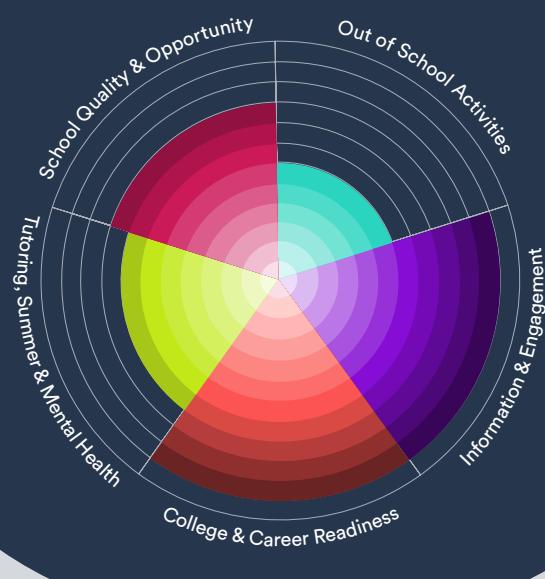

For the maps, a key provides the scale for the map and explains the numbers behind each of the four shades of blue. The darkest shade of blue is always the highest numbers and the lightest shade of blue is always the lowest numbers. Our state is outlined in red.

For the list, states are ordered from highest performing states at the top to lowest performing states at the bottom. Our state is identified with a red box to make it easier to spot.

# Louisiana in Context: A 50-State Perspective

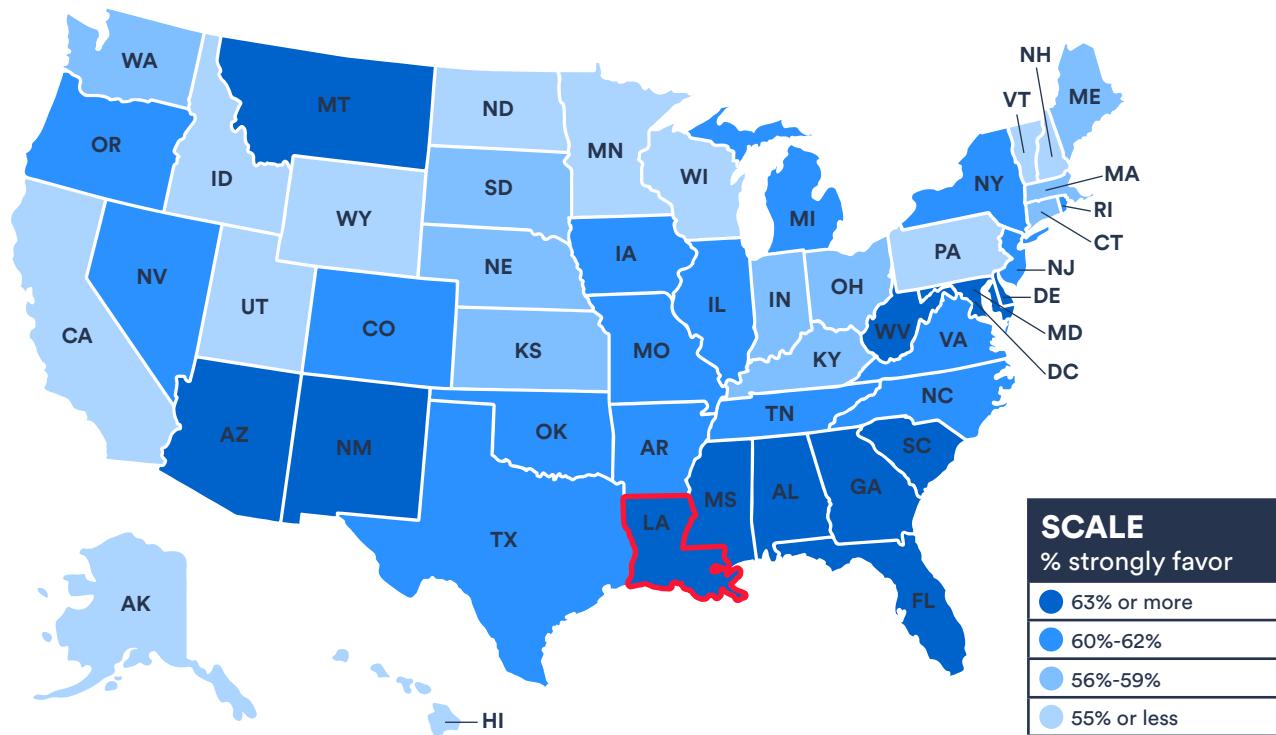

## SUPPORT FOR FREE TUTORING BY STATE

Percentage answering they favor free tutoring for K-12 students who fall below grade level

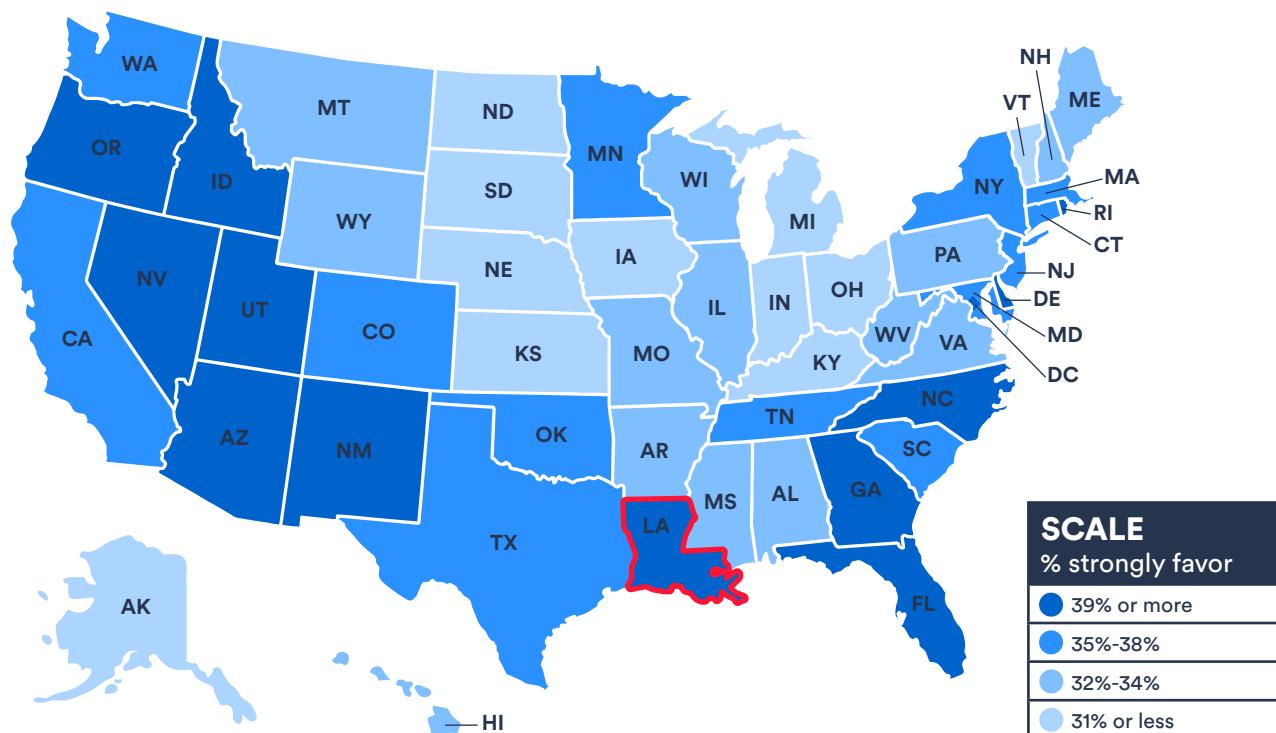

## STRONGLY FAVOR FREE TUTORING BY STATE

Percentage answering they strongly favor free tutoring for K-12 students who fall below grade level

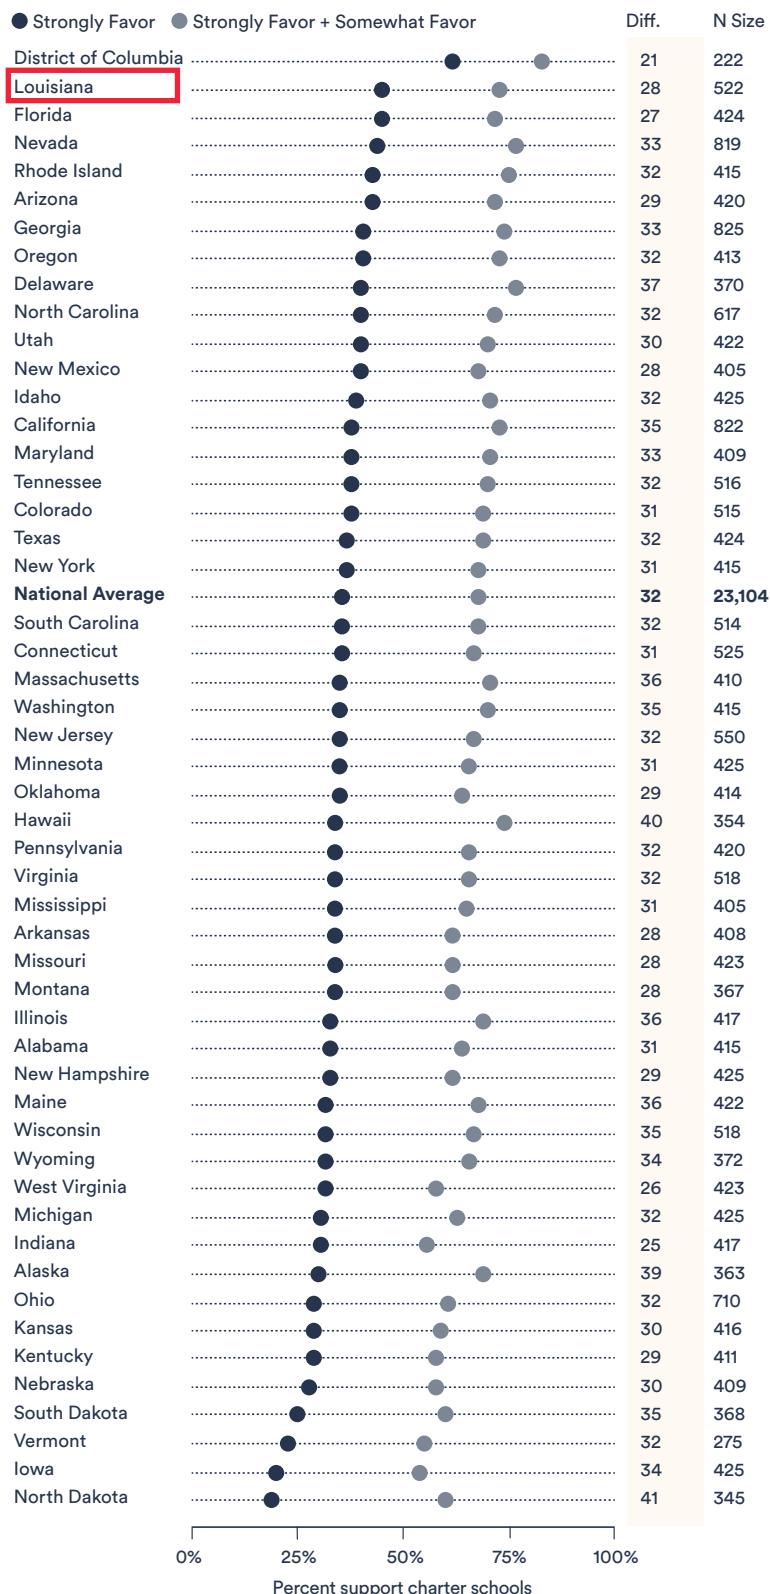

## STRONGLY FAVOR CHARTER SCHOOLS BY STATE

Percentage answering they strongly favor charter schools (public schools exempt from some regulations in exchange for greater accountability for results)

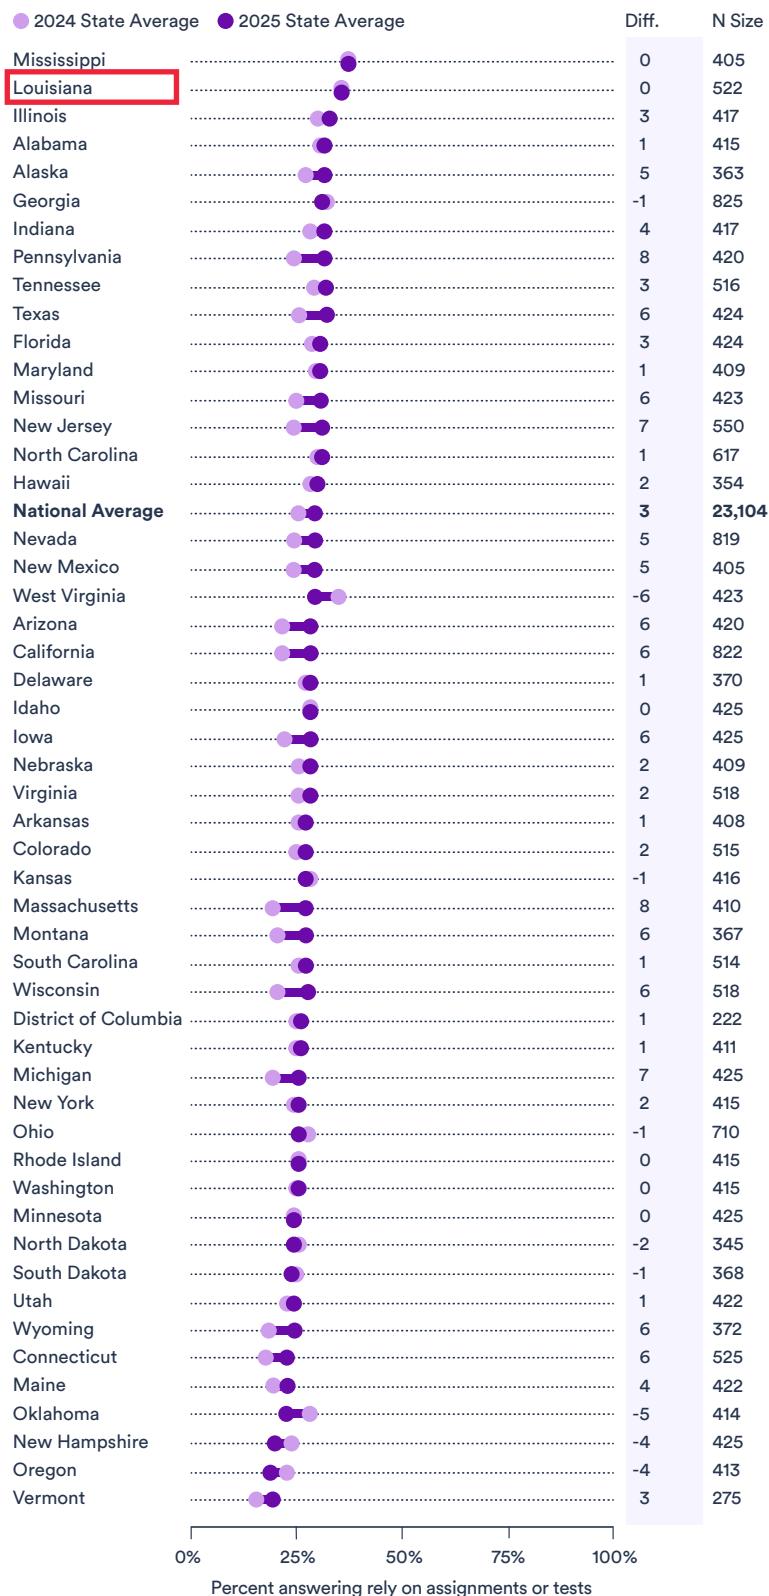

## SUPPORT FOR CHARTER SCHOOLS BY STATE

Percentage answering they favor charter schools (public schools exempt from some regulations in exchange for greater accountability for results)

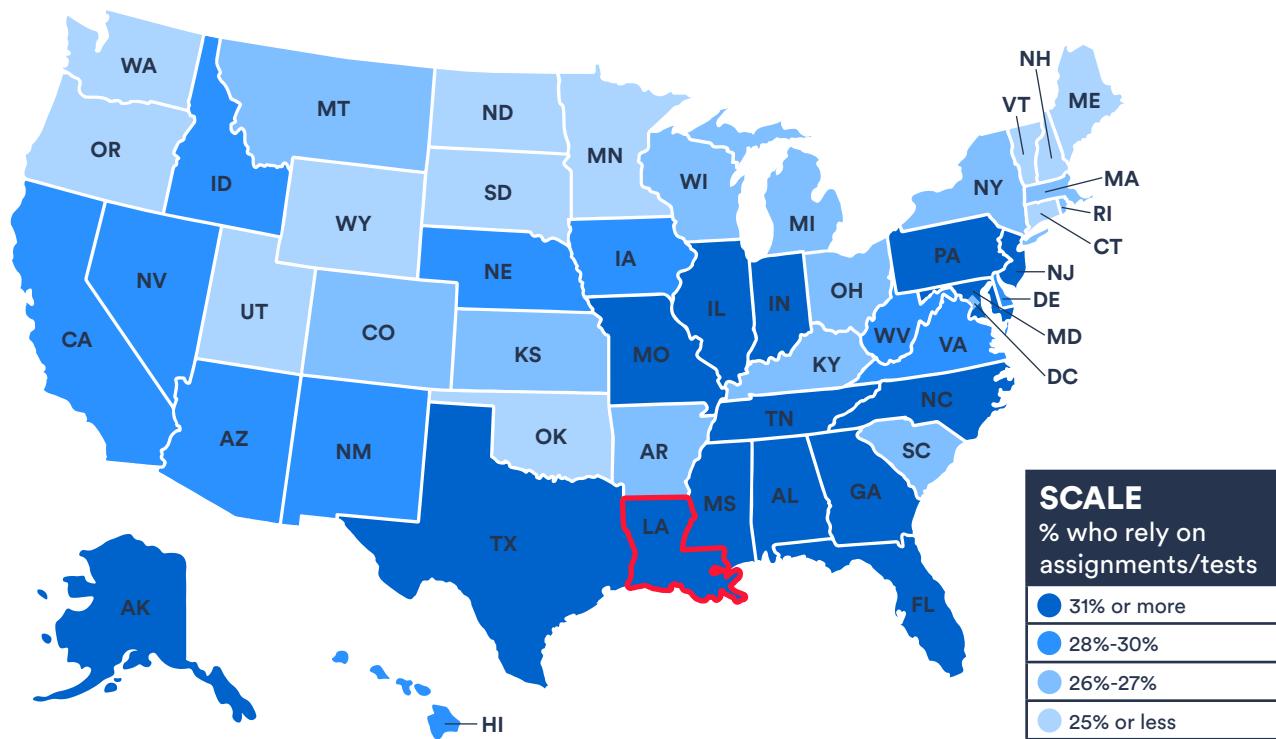

## RELY ON ASSIGNMENTS OR TESTS BY STATE & YEAR

Percentage who say they rely on graded assignments or standardized tests to determine if their child is on grade level

## RELY ON ASSIGNMENTS OR TESTS BY STATE

Percentage who say they rely on graded assignments or standardized tests to determine if their child is on grade level

## ABOUT LOUISIANA KIDS MATTER

**Louisiana Kids Matter** seeks to identify and advance common-sense policies that put the needs of students first. We engage local stakeholders—from community members to policy makers—to advocate for student success by ensuring all students have access to a high quality education. Our work in Louisiana focuses on empowering officials to support students by passing high-quality policies that improve educational outcomes for all kids.

## ABOUT 50CAN

**50CAN** is an education advocacy organization focused on building the dynamic, student-centered education system of the future so that all kids, regardless of address, receive a high quality education. At the center of this work is our support for local education advocates who together have secured more than 275 transformative policy wins since our founding in 2011. This advocacy work is complemented by fellowships to spark and amplify the voices of changemakers, support for educational entrepreneurs as they build proof points of a better tomorrow, and efforts to help elected leaders better serve the public through a deeper understanding of education policy.

## ABOUT EDGE RESEARCH

**Edge Research** tells data-driven stories that make our clients' programs, products, and brands successful. One of Edge's key verticals is education, which ranges from early childhood development, to K-12 and postsecondary education, to lifelong learning. We work for dozens of foundations, advocacy organizations, curriculum providers, associations, districts, schools and universities. Edge is constantly in the field talking to parents, students, teachers, administrators, and other education decision makers – getting the pulse on the issues that matter most.
